EDUCATION

2022 to 2025
Bachelor of Science in Information Technology
Yllana Bay View College, Inc.

CERTIFICATES

October 9, 2025
Overall Champion, Graphic Designing Competition
Cyberian Day 2025, YBVC College of Computer Education

August 30, 2025
Virtual Assistant Social Media Marketing Course (15 hours)
Freelance Academy

Intensive Online Freelance Design Workshop
Master Logo PH

CORE SKILLS

- Full-stack TypeScript (Next.js, React)
- PostgreSQL and Row Level Security
- Building with AI coding agents and reviewing their work
- Automated testing (database and browser)
- Secure login, user roles and audit logs
- Online payments and receipt verification
- IoT and embedded systems (ESP32)
- Deployment and staff training
- UI layout and graphic design

LANGUAGES

English, Filipino (Taglish), Bisaya

PROFILE SUMMARY

Full-stack developer who builds and ships complete systems for small businesses, from the database and access rules to the dashboard, the deployment and the hand-over. I work daily with AI coding agents (Claude) and review what they produce: my latest system, a dental clinic booking platform in Next.js, TypeScript and Supabase, is secured with Postgres Row Level Security and checked by 93 database tests and an 88-step browser test. Earlier I built PHP/MySQL business systems, a POS used by a sari-sari store client, and ESP32 IoT systems with live web dashboards.

SELECTED PROJECTS

SmileSlot: Dental Clinic Booking System — Next.js · TypeScript · Supabase · Vercel

Online booking and clinic management with four roles (patient, secretary, dentist, owner): live open times, guest or account booking with easy booking numbers, GCash/Maya receipt verification, one-tap closing of a dentist's morning or afternoon, staff management and an audit log. Double booking is blocked by a Postgres exclusion constraint; access rules are enforced with Row Level Security and database triggers.
smileslot-two.vercel.app · github.com/angeloufiel/smileslot

POS + Inventory System (client project) — PHP · MySQL · JavaScript

Point of sale for a sari-sari store client: barcode scanning, selling by piece, pack or weight, GCash QR, customer screen, shifts and day closing, deliveries, expiry tracking, a shopping list and automatic USB backup.

FarmDirect Dumalinao — PHP · MySQL · Bootstrap · PayMongo

Farmer-to-buyer marketplace with four roles (Customer, Farmer, Rider, Admin), GCash and card payments, rider delivery, order tracking and sales reports.

Pagadian City Library System — PHP · MySQL

Admin side and borrower portal with per-copy tracking, reservations, logbook and Excel reports, secured with CSRF protection and login lockout.

IoT and Mobile Systems — ESP32 · PHP · MySQL · Flutter

SafeTrack GPS child tracker with geofencing app, three-channel energy meter, LumiSense smart streetlights, heat stress alerts, a vending machine, egg incubator and quail feeder, each with a live dashboard.

TECHNICAL SKILLS

Web	TypeScript, Next.js (App Router), React, Tailwind CSS, Zod, PHP, JavaScript, HTML, CSS, Bootstrap 5, Python (FastAPI)
Databases	PostgreSQL / Supabase (schema, migrations, RLS policies, triggers, functions), MySQL
AI tools	Claude and Claude Code as coding agents, with review, testing and an AI review log
Testing	Playwright (end to end), Vitest, SQL database tests, GitHub Actions
Mobile, IoT	Flutter, Firebase; ESP32, Arduino IDE, current, voltage and climate sensors
Deploy, tools	Vercel, Git and GitHub, Hostinger, cPanel, XAMPP, VS Code; Photoshop, Illustrator, Canva

WORK EXPERIENCE

Freelance Web & IoT Developer — Self employed

Build, deploy and hand over systems for small businesses and IT students, including the POS above and complete web, mobile and IoT capstone systems.

Freelance Graphic Designer, Fiel Custom Graphics — 2023 to Present

Posters, tarpaulins, invitations, sublimation layouts and branding for print and digital clients.
